

Nqobile Twala

FINAL YEAR BUSINESS INFORMATION TECHNOLOGY STUDENT

076 822 6726 | nqobiletwala02@gmail.com | Johannesburg, GP | [LinkedIn](#)

----- PROFESSIONAL SUMMARY -----

Business Information Technology student at the University of Johannesburg with practical experience in software development, web technologies, and Agile project environments. Experienced in applying technical knowledge to practice business requirements through industry exposure at BBD Software Development and web development training with Umuzi Academy. Strong problem solving, analytical and communication skills, with experience collaborating on projects, engaging stakeholders and learning new technologies. Interested in using technology to solve business challenges and contributing to innovative solutions in a professional technology environment.

----- SKILLS -----

Soft Skills

Problem-solving | Analytical Thinking | Team Collaboration | Curiosity | Communication | Adaptability | Time Management | Creativity | Reliability

Technical Skills

Programming & Web: Python | SQL | HTML | CSS | JavaScript | C# | TypeScript
Development: React | Next.js | Node.js | Git | GitHub | Agile/Scrum Fundamentals
Tools: Microsoft 365 | Canva | Figma | Visual Studio Code | Vercel | Docker

----- WORK EXPERIENCE -----

Vacation Work, BBD Software Development | JHB

December 2025 – January 2026

- Contributed to the development of full-stack Stock Management and Frail Care applications, using Node.js, Typescript, React, Prisma, and Docker
- Translated business requirements into functional software features while working within the Agile development environments.
- Participated in code reviews, daily stand-ups and collaborative development activities alongside other team members.
- Developed and presented functional application features, strengthening technical communication and the ability to explain solutions to peers and facilitators.

Vacation Work, BBD Software Development | JHB

November 2024 – January 2025

- Collaborated on a simulated software development project, applying Agile practices to plan, develop and present software solutions.
- Developed small-scale web applications across front-end and back-end components, applying programming concepts to practical development tasks.
- Presented project outcomes to peers and facilitators, developing communication, teamwork and technical presentation skills.

Web Development Recruit, Umuzi Academy | JHB

April 2022 – November 2022

- Completed intensive web development challenges in HTML, CSS, and JavaScript to build functional web pages and applications
- Applied problem-solving and debugging techniques to complete practical coding challenges and troubleshoot development issues
- Strengthened independent learning and adaptability through structured, real-world development challenges.

-----VOLUNTEER EXPERIENCE-----

PR & Social Media Executive, UJ Developer Society | JHB

March 2026 – Present

- Collaborate with the society's PR and social media team to plan and deliver digital communications for technology-focused events and initiatives.
- Create and coordinate promotional content across digital platforms, supporting event visibility and engagement with the student developer community.
- Communicate with team members and external collaborators to support the promotion of tech initiatives.

PsyCaD Career Services Ambassador, University of Johannesburg | JHB

February 2026 – Present

- Represent the Centre for Psychological Services and Career Development by communicating student support and career resources across campus.
- Engage with students through outreach initiatives, communicating information clearly and adapting communication to different audiences.
- Support initiatives that connect students with relevant university resources and services.

-----PROJECTS-----

Healthcare (HCCRM) – Synexis Group Project

2026 - Present

University of Johannesburg | React, Next.js, TypeScript

- Contributing to the development of a healthcare CRM connecting EMS services and hospitals as part of a student software development team.
- Designed and collaborated in implementing the Doctor Dashboard, including summary statistics, patient management, alerts and daily scheduling functionality.
- Collaborate within an Agile team and contribute to product and sprint backlogs and other sprint documentation.

Docker Cleanup CLI – Personal Project

[GitHub](#)

Node.js, TypeScript, Docker API

- Developed a command-line tool to identify unused Docker images, stopped containers and orphaned volumes and estimate reclaimable disk space
- Integrated the Docker API to inspect local resources and provide users with actionable cleanup information.
- Implemented a safe dry-run workflow, requiring explicit confirmation before destructive cleanup operations.

Grade Target Calculator – Personal Project

[Live Demo](#)

Next.js, TypeScript, Tailwind CSS

- Developed a web application that calculates the average marks required across remaining assessments to achieve a target final grade.
- Implemented colour-coded risk indicators to help users quickly understand their current academic position
- Deployed the application on Vercel and made the tool accessible through a live web interface.

-----EDUCATION-----

University of Johannesburg | JHB

- Diploma in Business Information Technology (2024 – Present)
- Bridging Programme in Commercial Accounting (2023) – Certificate of Merit
